SUMMARY

Computer engineer with hands-on experience in wearable haptics and a record of 15 peer-reviewed publications. Background includes embedded hardware and medical AI.

EXPERIENCE

Qatar University Sep. 2026 - Present
Wearable Haptics Research

- Develop an improved haptic glove based on the earlier Qatar University prototype, integrating ESP32 microcontrollers with inertial measurement units (IMUs), actuators, and supporting electronics.

Weill Cornell Medicine - Qatar Oct. 2023 - Jul. 2026
AI Research Specialist

- Developed retrieval-augmented AI applications, from document processing and search to backend integration through REST APIs.
- Benchmarked prompts, models, and retrieval configurations using evaluation datasets; added validation checks and monitored output quality after release.
- Prepared datasets under privacy constraints and fine-tuned models where pretrained models fell short.

Qatar University Oct. 2023 - Dec. 2023
Research Assistant, Department of Mathematics, Statistics and Physics

- Trained and evaluated deep learning models to segment stroke lesions in MRI scans; contributed to the resulting publication.

Qatar University Jun. 2023 - Oct. 2023
Research Assistant, Department of Computer Science and Engineering

- Prototyped haptic devices combining multiple feedback mechanisms.
- Built experimental setups and simulations in MATLAB and Unity.

SELECTED PUBLICATIONS

MERA: Medical Electronic Records Assistant 2025
Machine Learning and Knowledge Extraction, MDPI. Clinical record retrieval and summarization.

ChatCVD: A Retrieval-Augmented Chatbot for Risk Assessment 2025
AI, MDPI. Personalized cardiovascular risk assessment and comparison of medical and general-purpose LLMs.

TriAgent: An Adaptive Multi-Agent Architecture for Decision Support 2026
AI, MDPI. Adaptive agent coordination for decision support with incomplete information.

EDUCATION

Qatar University Jan. 2019 - Jun. 2023
BSc in Computer Engineering

SKILLS

Programming: C++, Python, MATLAB, SQL, R
Tools and platforms: Unity, Git, REST APIs, PyTorch, Hugging Face, Azure
AI frameworks: LangChain, LangGraph, LlamaIndex
Languages: Arabic (native), English (fluent)
Awards: Winner, Health Hackathon; 2nd Place, Senior Design Project Contest; 2nd Place, Capstone Design Competition
